2016 – 2026 – Associate Professor in Operative Dentistry – Sao Paulo State University

2026 – current - Associate Professor in Advanced Restorative Dentistry – Charles Sturt University

Eduardo Bresciani earned his DDS from the Bauru School of Dentistry, University of São Paulo, Brazil, where he also completed his Master's and PhD in Restorative Dentistry. He has held academic positions at several institutions, including the University of Michigan, Cruzeiro do Sul University, and São Paulo State University.

He is currently an Associate Professor in Advanced Restorative Dentistry at Charles Sturt University, Centre for Rural Dentistry and Oral Health. His research experience spans the mechanical and optical properties of dental materials, clinical trials in restorative protocols, and systematic reviews and meta-analyses. He has also taught a range of graduate-level subjects, including scientific writing, dental research methodology, biostatistics, and clinical trials in restorative dentistry.

His current research interests focus on digital dentistry, particularly its impact on material properties and the evolution of clinical protocols. He is also completing an undergraduate degree in Data Science in Brazil, further strengthening his interdisciplinary research approach.
