Dr. Rayana Duarte Khoury has extensive academic and technical experience in the field of endodontics. She has published over 20 full articles in peer-reviewed journals and contributed to 3 book chapters. She is also a scientific reviewer for national and international journals. Her research interests include: the bidirectional relationship between dental infections and systemic disorders/habits (e.g., chronic stress); the microbiological profile of patients with primary and secondary endodontic infections; long-term success of endodontic treatments; and antimicrobial agents and control methods for endodontic infections.
